

KNOWLEDGE PEOPLE SEARCH FOR SMART BRAINS!

With immediate effect, our IT Team in Bonn is looking for a

Senior Cloud Application Architect (f/m)

Your tasks

- » You choose existing and emerging technologies to create new and improve existing high-performance cloud applications that scale
- » You support and challenge your team with best practices and work on solutions that fit the needs both of a scientific community and business users
- » You support the evolving architectures of our software projects
- » You help us finding the best solutions for our customers and users, always trying to find the best compromise between scope, budget and time limits

Your qualification

- » Ideally, you have expert knowledge of current cloud technologies and architectures
- » Several years of experience in the design of cloud applications, experience with using Docker and orchestration engines such as Docker Swarm, Kubernetes or Mesosphere
- » You have a strong analytical background and have good skills in creating and communicating architecture concepts

We offer you

- » At Comma Soft, we offer the creative freedom and empowerment to create and strongly influence the design of new innovative solutions for our users
- » You will work in an interdisciplinary team of developers, data scientists and UX experts, with exciting and challenging project from Data Business and academic research
- » The company offers a culture of innovation and versatile possibilities for personal advancement and training; and short, personal, and efficient access channels up to the top management level allow us to keep improving every day

We are looking forward to your meaningful application under consideration of your earliest starting date and your salary demands via E-Mail to our Recruiting Manager:
